## Additional information:

I'm looking for an opportunity to take advantage of the experiences I've already had and to learn a lot more from new proposals. I am looking for a change in my career working in the programming area. With the experience of being a professor, added to the experiences of management and administration in companies, I can help in the most diverse areas and therefore I intend to always continue learning and developing myself. Today I take a web development course to develop myself beyond college and, in my spare time, I have a hobby of skydiving.
